Navin

Indoor navigation made easy

Share this page : [in](#) [f](#) [t](#)

About

VISION, MISSION, SOLUTION
 The key problem is that GPS signals are unavailable inside buildings, rendering existing solutions useless. Whatever works for roads, does not work inside buildings. As a result, indoor venues, like hospitals, universities, and airports, install and maintain thousands of beacons or require detailed floor plans and manually map each specific building, floor by floor. This is NOT a scalable approach. Navin's patented crowd indoor-mapping offers a dramatically different approach that turns smartphones into anonymous mapping devices. Smartphones passively capture indoor structure in 3d using AI/deep-learning and aerospace technology.

Product & Technology
 Navin patented technology breakthrough enables fast upscale, to become the world's #1 community based pedestrian guidance and navigation app. The technology anonymously tracks people's location using sensors on their cellphones, incrementally creating big data movement patterns from millions of data points and automatically inferring the location's map from the data. Navin's servers then use analytics to detect crowd movement patterns. The technology relies on patented algorithms that generate maps from many different individual data points, using cellphone's sensors and graph connectivity methods.

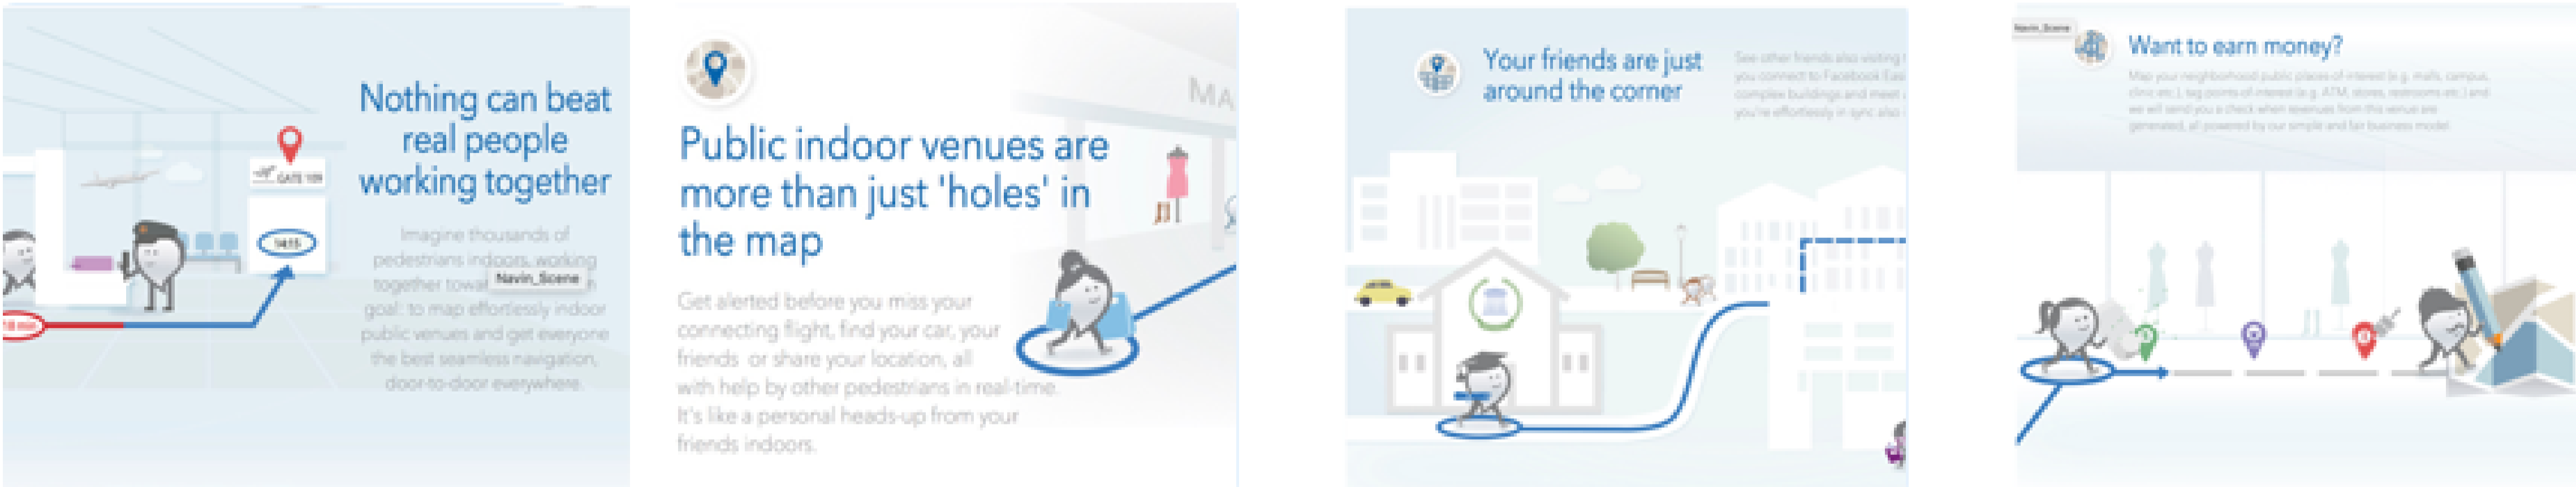

Around The Web \ Use Cases

This is a title
 And this is a body of text. And this is a body of text. And this is a body of text. And this is a body of text. And this is a body of text. And this is a body of text. And this is a body of text. And this is a body of text.

What's Next \ Roadmap

Main focus today
 Launch in Tel-Aviv by the end of 2018 and in San Jose California by Q1 2019.

What's next:
 Growth worldwide city by city

Profile

Company Name : Navin
Founded : 06/2017
Headquarters : Rokach Blvd 101, Tel Aviv- Yafo, Israel Tel Aviv, Israel
Raised : \$2M
Major Investors : Sherpa, InnoVentures
Prominent Clients : Major Hospital Chain
Awards & Recognition : Navin has received support from the Israeli Innoavtion authority.
 8200 EISP accelerator graduate
 Microsoft Ventures accelerator graduate
 Fusion LA batch #2 graduate
 Patents granted in Europe
 Approved patent in the US

The Team

Navin consists of a group of seasoned business, technology, science and entrepreneurship professionals with many years of experience in related industries and proven track-record. Our team built and delivered complex products, led multidisciplinary teams and founded successful companies.

Shai Ronen
 Founder & CEO
 Over 25 years' experience in SW, HW and communication companies. CEO, founder or chairman of IXI, Modem Art, Widcom, Envara, Butterfly, DSPC. Few went IPO, other sold to Intel, Broadcom, TI, Agere etc

Gidi Barak
 Founder & Chairman
 Over 25 years' experience in SW, HW and communication companies. CEO, founder or chairman of IXI, Modem Art, Widcom, Envara, Butterfly, DSPC. Few went IPO, other sold to Intel, Broadcom, TI, Agere etc
